Profile

Passionate and experienced full-stack engineer with over 10 years of expertise in creating eye-catching and user-friendly interfaces. I co-founded a startup that grew to over 38 million users and successfully exited. I am currently exploring AI, with a focus on generative UI and agentic architectures.

Employment History

Head of Design, Talent Inc, New York, USA

August 2021 — August 2022

- Launched a new core product (career.io) to market.
- Defined design strategy for the company.
- Hired and managed 8 designers.

Founding Engineer, Resume.io (Acquired by Talent Inc.), Breda, Netherlands

June 2016 — August 2021

[Resume.io](#) is an online resume builder with integrated AI tools that helps job-seekers get hired faster.

- My co-founders and I built the company from idea to industry-leading resume builder used in 150 countries by 15,000,000 people.
- Designed and built the initial version of the product.
- Assembled a world-class team of designers and engineers.
- Setup a product strategy focusing on a user-centric approach.

Front-end Developer and Designer, Sokikom (Acquired by Jumpstart), San Jose, USA

October 2016 — September 2017

[Sokikom](#) is an online platform for students to study math in a gamified form. I was responsible for the design and development of a student interface.

- Redesigned 15+ games and rewrote them to React.js and Redux.
- Designed and built a dashboard for students.
- Lead a team of 2 developers and 2 designers.

Front-end Developer and Designer, These Guys, Rostov-on-Don

September 2015 — June 2016

Founded a small design and development studio with my friend. In there we've been working on various projects:

- React and D3 library for displaying trading charts.
- Fantasy gaming iOS app developed with React Native.
- Interactive notation library for [Baymard Institute](#) with D3.js.

Software Developer, Smartomato, Rostov-on-Don

October 2013 — September 2015

[Smartomato](#) is a SaaS that helps restaurants to build their own website and set up delivery. My responsibilities were UI/UX design and front-end development.

- Designed and developed a user-facing portal using Ember.js front-end and Ruby-on-Rails back-end. The service is still working helping to organize food delivery in 1400 restaurants in Russia.
- Designed and developed a website builder system for restaurants.
- Designed and developed React Native app that can be white-labeled by a restaurant.

Education

MSc/MA Innovation Design Engineering, Imperial College & Royal College of Art, London, UK

September 2022 — August 2024

MSc Computer Science, SFedU & LUT, Russia / Finland

September 2014 — July 2016

Bachelor of Information Technologies, SFedU, Rostov-on-Don, Russia

September 2010 — July 2014
