Typescript

PROFILE

Self-taught programmer with 5 years of experience in Front-End Development, excelling in crafting high-performance, scalable, and cost-effective web applications. My primary areas of expertise are ReactJS, Javascript and TypeScript which I leverage to engineer top-tier user interfaces.

I am deeply engaged in furthering my expertise in SOLID code principles with rigorous unit testing, and Micro-Frontend Architecture. These pursuits not only elevate my skills as a developer but also contribute to the quality and efficiency of my assignments.

EDUCATION

Front-End Developer, Alura Technical School
October 2020 — October 2021

Alura is a Brazilian education platform for technology courses that offers approximately 1,130 specialties divided into eight major areas including Front-End Training and specialties of a web developer such as automation and performance. At Alura I completed several courses that can be detailed in the certificate area.

WebJournalism, Federal University of Alagoas
January 2005 — January 2009

Researches in digital journalism at university, as a scholarship student in a national program, led me to reflect about my profession's possibilities which culminated in my degree's work in web journalism with podcast technology.
