PROFILE

Being part of a team that develops solutions that add value to others is what I love to do. Im thankful for the projects Ive been a part of but with humility know that there is still much to learn. My future career goals is to continue this path, never stop learning and always try to help others along the way. Excited for what is next!

EMPLOYMENT HISTORY

Freelance web developer
October 2023 — Present

First Client:

Developed and launched a restaurant website using React/Next.js, Tailwind and hosted in Vercel. Still working on new features for this client. Some key achievements:

- 100 visitors a week
- Ability for customers to see website in both Spanish and English using localization for our International customers

Front End Engineer at Digismoothie, Prague
May 2022 — July 2023

Digismoothie is a company specializing in high-quality Shopify app development, among other services. As a Front-end Developer, I utilize my expertise in HTML, JavaScript, CSS, React, TypeScript, GraphQL, Cypress among others to improve and maintain Shopify apps. Some features I developed where:

- Implement ability to translate our app's content to multiple languages using @shopify/react-i18n
- Built part of our new client on-boarding using a dynamic step by step banner
- Our app had before ability to show products with 1 image size, with BE support I added ability to select multiple sizes

In addition, I collaborate with the support team to provide tailored solutions for our clients, addressing their unique needs and requirements.

QA Engineer at SinnerSchrader
February 2020 — April 2022

Primarily worked as a tester for a single client project. We took an Agile approach, focusing on delivering high quality software in a timely manner. My everyday goal was to assist my team in this mission and take those leanings to other colleagues in different projects. Apart from Manual Testing, other areas I worked on for my day where Automation, API Testing, Data-driven analysis and Process Improvement to name a few.

Industrial Engineering Consultant at Logile Inc.
November 2016 — August 2019

I was a team leader in project deliverable's focused on implementing labor management software solutions through analysis of current operations and identification of opportunities in productivity improvements for the clients organization. Worked in projects with U.S. based retailers like Heinens, Lowes, Smart and Final, and Vallarta Supermarkets.

EDUCATION

Full Stack Web Development, Coding Bootcamp Prague, Prague
September 2019 — November 2019

Three month intensive course. Languages and frameworks we worked with include: React.JS, JavaScript, HTML/CSS, Bootstrap/Reactstrap, PHP, Laravel, MySQL.

B.S. Industrial Engineering with Minor in Systems Engineering, ITESM, Monterrey, Mexico
August 2011 — May 2016

Business Certificate in China, Fudan University, Shanghai, China
August 2014 — December 2014
