Profile

- **Proven track record** of delivering **high-impact solutions** by aligning **development efforts** with **business outcomes**, driving **measurable success** and **customer satisfaction**.
- Played a pivotal role in integrating and managing over 22 platforms, directly contributing to $2+ million in revenue and enabling 4 high-ticket customers in the past 9 months.
- Key contributor to securing pre-seed funding, showcasing leadership in driving product development and business growth in a fast-paced startup environment.

Experience

Backend Engineer, RevSure.AI , Bengaluru

MARCH 2024 — PRESENT

As the **primary backend engineer in data integration**, I independently designed, built, and maintained all integration services, ensuring seamless data flow for business-critical insights.

Key contributions include:

- Developed robust, **scalable microservices on Google Cloud Platform (GCP)**, managing all customer data integrations.
- Enabled **4 high-ticket customers**, contributing to **$2+ million in revenue over nine months** through successful integration solutions.
- Led the development of the core **Java-based integration application**, ensuring efficient data entry and processing.
- Managed over **22 integrations** across platforms such as **Salesforce, HubSpot, LinkedIn, Google Ads, and Facebook Ads**, ensuring smooth customer data flow.
- Designed scalable **Apache Airflow DAGs** for integrations like **6sense, People Data Labs, and ZoomInfo Enrichment**, optimizing workflow efficiency.
- Handled **customer integration onboarding** and **enhanced** the first-party pixel for event tracking, improving client experiences.
- Demonstrated expertise as a **researcher and learner**, swiftly mastering **new tools and technologies** to address **business needs**.

Full Stack Engineer, CBREX, Bengaluru

JANUARY 2019 — OCTOBER 2023

As a **Full Stack Engineer**, I played a key role in developing core infrastructure and **delivering business-critical features** that helped secure **pre-seed funding** (https://bit.ly/economictimes-cbrex).

Key contributions include:

- Developed a **service-oriented architecture** to improve system modularity and reduce dependencies.
- Led a team to deliver a major project **on time and within budget**. Conducted **code reviews** and mentored junior developers to improve code quality and practices.
- Enhanced **database performance** for better speed and scalability.
- Designed a **cloud-based application**, boosting system reliability by **97.4%**.
- Created a **cross-platform mobile app** that reduced transaction times by **78%, increasing revenue**.

Freelance

Wanderly.io Beta

OCTOBER 2024 — DECEMBER 2024

- **Business Need:** Simplify travel planning using AI.
- **Contribution:** Spearheaded the development of the beta version, incorporating a ChatGPT Wrapper for Itinerary Generation with multiple API integrations (ChatGPT, Google Maps API, and Distance Matrix API). Achieved seamless functionality using Firebase, Next.js, Redux, and Redis.
- **Tech Stack:** Firebase, Next.js, Redux, Redis
