01 PROFILE

Experienced software engineer with a demonstrated history of working in the computer software industry. Skilled in Ruby, Rails, Web Crawling, React & React Native, JavaScript and Databases. Strong entrepreneurship professional with a Bachelor of Computer Science.

02 EMPLOYMENT HISTORY

10/2020 **Senior Software Engineer at Firstline** *Vancouver*

Firstline is a platform for ID professionals to create more impact for their guidelines. My responsibilities include development of Firstline core product (Ruby on Rails), as well as development of mobile app (React Native).

10/2016 — 04/2020 **Senior Software Engineer at mobiMAPS** *Vancouver*

My responsibilities include development of all mobiMAPS core products (Ruby on Rails, React, React Native) and managing a team of 7 engineers. Since joining the team, I have helped the company make the transition from print advertising to digital.

12/2011 — 05/2016 **Software Engineer at C.E.S. Group** *Vancouver*

My responsibility include working on development of the CES Group advanced energy management information system, creating dashboards using Java and JavaScript data visualization libraries where clients can read their real-time energy consumption.

Singidunum University *Belgrade*

Computer Science and Management

04 SKILLS

Complex Problem Solving

React

Ruby

React Native

Rails

JavaScript

Web Scraping

SQL

05 PROJECTS

Random Data API

Random Data API is a tool that helps developers generate fake data for their projects, in JSON format or as database tables. The service has been used by Microsoft, W3Schools, Slack, and Telegram.

Website: <https://random-data-api.com>

Bankingpoint

Bankingpoint is a lending automation platform for microfinance institutions. Platform supports residential and commercial lending products, automatic credit risk assessment engine, schedule calculations, repayment collections, and more. I developed the platform using Ruby on Rails, Stimulus and Hotwire.

Website: <https://bankingpoint.io>

TraceMetric

TraceMetric is a SAAS for online sellers helping them track their sales, profit margins and expenses across variety of marketplaces like Etsy, Poshmark, Facebook marketplace, and more. I built this with Ruby on Rails.

Website: <https://tracemetric.io>

PayGate Gem

The PayGate Ruby library provides convenient access to the [PayGate PayWeb 3 API](#) from applications written in the Ruby language.

Ruby gems: <https://rubygems.org/gems/paygate>

Unleashed CRM Ruby Gem

Unleashed is a powerful, integrated platform that allows businesses real-time visibility of accurate inventory information. Businesses of all sizes can reduce their costs and increase profits by precisely tracking data on stock.

I've developed a Ruby wrapper for their APIs.
