Profile

As a seasoned executive with over two decades of experience in **digital transformation** and **IT management**, I have a proven track record of driving innovation and aligning technology strategies with business objectives across multiple industries, including energy, retail, and utilities. My expertise spans **cloud computing, AI, machine learning, and digital solutions**, with deep experience in **AWS services** and cloud infrastructure. Having led cross-functional teams, I have consistently delivered impactful results by leveraging emerging technologies like serverless architecture and big data analytics to support business growth, improve operational efficiency, and reduce costs.

In my role as Chief Digital Officer at Polaris Engineering, I defined the **company's technology vision** and **executed cutting-edge AI** and IoT-driven solutions tailored for B2B sectors. My experience in fostering strategic partnerships, **managing high-performing teams**, and **delivering transformative digital solutions** positions me to excel as a Technical Account Manager at AWS. I am passionate about being a trusted advisor to enterprises, helping them navigate their cloud journey and unlocking the full potential of AWS to drive innovation in the energy sector.

Employment History

CDO, Chief Digital Officer, Polaris Engineering SPA, Milano

March 2023 – Present

I am at the forefront of crafting and implementing our **digital and business strategies**. I spearhead our R&D unit, focusing on the development of cutting-edge **Generative AI** and **ML solutions**, with a specialized emphasis on **conversational assistants** and **LLMs open source** tailored for the B2B sector (Industry, Reail, Ho.Re.Ca. and HR)
